

PROFESSIONAL SUMMARY

UC Berkeley Master's student with a background in IT business analysis, focused on Product Management. Experienced owning product work across the full lifecycle; from user research and requirements to prototyping, stakeholder alignment, and delivery; and supporting senior product leads in cross-functional, multinational environments. Passionate about building technology that improves people's lives; and thrive working across cultures and disciplines to do it.

EDUCATION

UC Berkeley, School of Information

Berkeley, CA | Aug 2025 – May 2027

- Master of Information Management and Systems (MIMS) - California Promise Fellowship recipient.

Universidad de Piura

Piura, Peru | Mar 2015 – Dec 2019

- BS in Industrial and Systems Engineering - GPA 3.67 | Top 5 in the class.

Politecnico di Milano - Exchange Program

Milan, Italy | Feb 2018 – Feb 2019

- Attended courses at the Master's in Management Engineering.

PROJECTS

Discovery Mode (Lean/Agile Product Management)

- Designed a Spotify feature concept with a functional conversational interface; conducted user interviews, competitive analysis, and iterative prototyping to validate and refine the product vision.
- Translated findings into a product strategy and interactive prototype, iterating across multiple rounds of feedback until experience and vision aligned.

Common Thread (Introduction to User Experience Design)

- Led UX research with Bay Area service providers to ground a community resource-matching platform in how organizations operate, not assumed workflows.
- Delivered a high-fidelity Figma prototype covering full information architecture and interaction design, driven entirely by research findings.

Happiness in the Americas (Information Visualization and Presentation)

- Led design and implementation of two interactive visualizations for a data storytelling website on the World Happiness Report; owned concept, Figma mockups, HTML implementation, and post-usability-test iterations.
- Conducted usability testing and incorporated findings into redesigns, improving discoverability and user comprehension.

Neuro-Orchestrator Agent (Fundamentals of Generative AI)

- Contributed to an AI task-planning assistant designed for neurodivergent users; led dataset design, quality evaluation, and model experimentation to compare fine-tuned language model variants.
- Developed an LLM-as-judge evaluation framework to assess plan quality across different dimensions.

Jaime's Recs (Information Organization and Retrieval)

- Built and shipped a semantic search app that lets users explore my personal Spotify library through natural language, using NLP and manually curated song metadata to match vibe over keywords.

PROFESSIONAL EXPERIENCE

NCE Engineering & Environmental Services – Field Technician (Data Collection) Richmond, CA | Oct 2024 – May 2025

- Collected and QA'd storm drain and pavement data for a ~7,000-asset municipal infrastructure project while preparing to begin the MIMS program at UC Berkeley.

WebCreek – Business Analyst

Lima, Peru | May 2021 – Nov 2022

- Supported product development of a procurement and inventory management app for a global oil and gas drilling contractor, built to scale across 300+ rigs and warehouses in 14 countries.
- Led the first phase of the app's international launch in West Asia, serving as an in-house consultant in Houston for two months; ensured effective stakeholder communication and successful customer adoption.
- Defined product requirements and managed change requests across 35+ stakeholders; from end-users to upper management; ensuring timely delivery and high customer satisfaction.
- Owned product demos and development status presentations to client teams and upper management, maintaining transparency and alignment across a 17-person cross-functional team.

KEY SKILLS

Product & Design: Agile/Scrum, Figma, Jira, Tableau, Google Analytics

Research & Strategy: User Research, Usability Testing, Competitive Analysis, Requirements Analysis, Business Process Modeling

Technical: SQL, Python, Observable Plot, GitHub, Excel

Languages: English (Fluent), Spanish (Fluent), Italian (Intermediate), Mandarin (Basic)
